Follow these directions for using the Arrow Selection Chart:

- Step #1 Determine point weight for compound bows (85-, 100- or 125 grain) or use the traditional chart for longbows or recurves.
- Step #2 Find your arrow length (not draw length) from the arrow length section.
- Step #3 Find your draw weight on the selection chart on the left side.
- Step #4 Determine your spine group number by finding where these points intersect.
- Step #5 Use your spine group number with the charts on the right side to identify arrows that are correctly spined.
- Step #6 Use the product catalog or visit the website at goldtip.com to choose an arrow that best meets your needs.

Group 1		
Shaft	Size	Spine
Ultralight	600	.600"

Group 2		
Shaft	Size	Spine
Ultralight	500	.500"
CAA	500	.500"
Pro Hunter	3555	.500"
XT Hunter	3555	.500"
Exp Hunter	3555	.500"
Falcon 35	35	.500"

Group 3		
Shaft	Size	Spine
CAA	450	.450"

Group 4		
Shaft	Size	Spine
Ultralight	400	.400"
CAA	400	.400"
Pro Hunter	5575	.400"
XT Hunter	5575	.400"
Exp Hunter	5575	.400"

Group 5		
Shaft	Size	Spine
CAA	350	.350"
Pro Hunter	7595	.340"
XT Hunter	7595	.340"
Exp Hunter	7595	.340"

Group 6		
Shaft	Size	Spine
CAA	300	.300"
Ultralight	300	.300"

Group 7		
Shaft	Size	Spine
Big Game	100+	.280"
